

 Patient Name
 : Mr.DEEPAK

 Age/Gender
 : 50 Y 4 M 13 D/M

 UHID/MR No
 : UD2122/003587

 Visit ID
 : OP2526/002346

 Ref Doctor
 : Dr.Dr. SUJAYENRA

IP/OP NO :

Collected : 12/Jul/2025 09:14AM
Received : 12/Jul/2025 09:42AM
Reported : 12/Jul/2025 11:26AM

Status : Final Report

Client Name : RLM ULTRA DIAGNOSTICS SERVICES

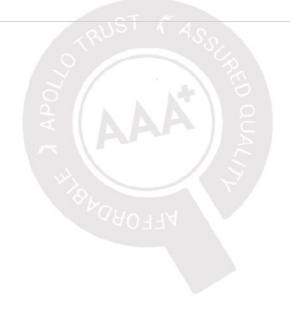

Center location : Kathriguppe,Bangalore

DEPARTMENT OF HAEMATOLOGY

Test Name	Result	Unit	Bio. Ref. Interval	Method
ESR , WHOLE BLOOD EDTA	05	mm at 1 hour	0-15	Modified Westergren

Comment:

- 1. ESR is an acute phase reactant which indicates presence and severity of an inflammatory process. ESR is not diagnostic of any specific disease. ESR is a screening test with low sensitivity. CRP has better sensitivity than ESR.
- 2. ESR Test is used to monitor the course or response to treatment of certain diseases.
- 3. ESR is an indirect measure of the extent of inflammation (infections, autoimmune disorders, certain anemias & malignancies).
- 4. There are many dieases such as typhoid in which ESR is not increased.

DEPARTMENT OF BIOCHEMISTRY

Test Name	Result	Unit	Bio. Ref. Interval	Method
C-REACTIVE PROTEIN CRP (QUANTITATIVE), SERUM	0.7	mg/L	0-5	Latex Particle Immunoturbidimetric

Comment:

C-reactive protein (CRP) is one of the most sensitive acute-phase reactants for inflammation. Measuring changes in the concentration of CRP provides useful diagnostic information about the level of acuity and severity of a disease. Unlike ESR, CRP levels are not influenced by hematologic conditions such as anemia, polycythemia etc.

Increased levels are consistent with an acute inflammatory process. After onset of an acute phase response, the serum CRP concentration rises rapidly (within 6-12 hours and peaks at 24-48 hours) and extensively. Concentrations above 100 mg/L are associated with severe stimuli such as major trauma and severe infection (sepsis).

Test Name	Result	Unit	Bio. Ref. Interval	Method	
URIC ACID, SERUM	6.00	mg/dL	3.5-7.2	Uricase	

Comments:-

Uric acid is an end product of purine catabolism. Most uric acid is synthesised in the liver & from the intestine. Two thirds of uric acid is excreted by the kidneys.

TERMS AND CONDITIONS GOVERNING THIS REPORT

- 1. Reported results are for information and interpretation of the referring doctor or such other medical professionals, who understand reporting units, reference ranges and limitation of technologies. Laboratories not be responsible for any interpretation whatsoever
- **2.** This is computer generated medical diagnostics report that has been validated by an Authorized Medical Practitioner/Doctor. The report does not need physical signature.
- 3. Partial reproduction of this report is not valid and should not be resorted to draw any conclusion.
- **4.** In the case you are not the intended recipient of this report. Please immediately return the same to the concerned issuing desk. Any disclosure, copy or distribution of any contents of this report, is unlawful and is strictly prohibited.
- **5.** Results delays may occur due to unforeseen circumstances such as non-availability of kits, equipment breakdown, natural calamities, IT downtime, logistic delays or any other unavoidable event. For certain tests based on analyte stability, criticality of results and in the interest of patient for having appropriate medical diagnosis, the same test may be outsourced to other accredited laboratory.
- **6.** It is presumed that the tests performed are, on the specimen / sample being to the patient named or identified and the verifications of particulars have been confirmed by the patient or his / her representative at the point of generation of said specimen
- 7. The reported results are restricted to the given specimen only. Results may vary from lab to lab and from time to time for the same parameter for the same patient (within subject biological variation).
- **8.** The patient details along with their results in certain cases like notifiable diseases and as per local regulatory requirements will be communicated to the assigned regulatory bodies
- 9. The patient samples can be used as part of internal quality control, test verification, data analysis purposes within the testing scope of the laboratory.
- 10. This report is not valid for medico legal purposes. It is performed to facilitate medical diagnosis only
